

Mith Vosh G. Opog

Backend Web Developer

✉ mithvosh@gmail.com ☎ 09666380295 📍 Danao City, Cebu 🔗 [linkedin.com/in/mithopog](https://www.linkedin.com/in/mithopog)

PROFESSIONAL SUMMARY

Backend Web Developer with strong experience in building and maintaining **scalable, high-performance systems** using **Node.js, Express.js, MongoDB, and AWS**. Proficient in **serverless architectures** with AWS Lambda, emphasizing **API optimization, reliability, and automation**. Hands-on experience with **EMR data migration, automated web scraping, and robust test automation frameworks** using **Playwright** and **Robot Framework**. Developed internal tooling integrating **OpenAI Whisper** for offline transcription and audio processing. Comfortable working across the stack with **Angular and React** in collaborative environments.

SKILLS

Backend Development

Node.js, Express.js, Mongoose, JWT, REST APIs

Database

MongoDB, Mongoose(NoSQL)

Tools & Workflow

Git, Postman, NGINX, Google API's, Whisper
OpenAI

Frontend Development

React, Angular, HTML, CSS, JavaScript

Cloud & DevOps

AWS Lambda, AWS EC2, AWS S3, Serverless
Framework, PM2

Automation Tools

Robot Framework (Selenium), Playwright

PROFESSIONAL EXPERIENCE

Software Developer

08/2025 – Present | Remote

Strongwill IT Solutions

- Contributed to **EMR database migration projects**, including automated data extraction via web scraping
- Designed and implemented **end-to-end automated testing** using **Playwright** and **Robot Framework (Selenium)**
- Developed **frontend components and workflows** using **Angular**
- Implemented **backend logic, APIs, and integrations** using **NestJS**

Backend Web Developer

2023 – 08/2025 | Cebu City, Cebu

G-angle Entertainment Cebu

- Designed and developed the backend for “AgendaV2”, a calendar and scheduling system**, using **AWS Serverless (Lambda, S3), MongoDB, Google Calendar API, and Node.js**. Enabled **automated scheduling, real-time event handling, and cloud-based file storage**.
- Developed “VoiceChecker”, a macOS desktop application** that leverages **Whisper by OpenAI (via Whisper.cpp)** for **offline voice transcription and scoring**. Packaged the app using **PyInstaller**, integrated **AppleScript** for auto-launch on macOS, and implemented **language-aware text processing** for improved accuracy.
- Maintained and enhanced legacy web applications** (“G-angle Management System” and “Attendance Management System”) by adding **new features, refactoring backend logic**, and improving **database query performance** with **MongoDB and Node.js**.
- Managed AWS EC2 deployments** using **PM2**, performed **production monitoring and debugging**, and delivered **hotfixes** to ensure high **availability and system stability**.

ICT Coordinator

2019 – 2022 | Compostela, Cebu

Lyceum de San Sebastian

- Led hands-on training sessions** in **Adobe Suite, Microsoft Office, and web development technologies (HTML, CSS, JavaScript)**, improving student proficiency in **digital literacy**. **Designed and implemented an interactive curriculum** to enhance **student engagement** and **technical skills**.

EDUCATION

Bachelor of Science in Industrial Technology

2018 | Danao City, Cebu

Cebu Technological University

Full Stack Web Development

Zuitt - Coding Bootcamp

2023

Diploma in Professional Education

Cebu Technological University

2019 | Danao City, Cebu
